Exam overview and strategy

- **Format:** e.g. 5 questions: 3 theory (50%), 2 situational (50%). 90 minutes.
- **Grading split:** e.g. midterm 30%, proposal 30%, final 40%.
- **What the lecturer said will appear** (from the transcript / review session):
  1. Topic A: "exact words she used" [transcript L5, seg. 2]
  2. Topic B
- **Not expected:** topics the lecturer ruled out.
- **The numbers you must memorise:** 4 objectives, 5 motives, 8 stages, …
- **Answer template:** (1) Definition, in the slide's wording → (2) how it works, the full list (all N items) → (3) a tiny example → (4) why it matters, or the trap.
- **Label each part of a multi-step answer**, so the grader finds every mark.

Jargon decoder (read this first)

1. **Term.** Plain-English meaning in one line. *Example:* a concrete one.
2. **Another term.** …

Later in the sheet, write `Term\gl{term:example}` and it prints Term[1], pointing back here.

1 — Topic name (Midterm + Final)

Source: `Lecture 1.pdf`, slides 3–20.

Exam cue: *"What is X and why do we need it? I will ask this."*

Concept name

Lecturer's definition (Lecture 1, slide 5)

The lecturer's exact definition, with the **defined term in bold**.

What it is: One plain sentence.

How it works: The mechanism, in order.

Tiny example: Something concrete from IT / everyday life.

Why it matters / trap: Why the exam cares, and the look-alike it gets confused with.

Memorise this chain (5 items, slide order)

Step 1 → **Step 2** → **Step 3** → **Step 4** → **Step 5**. *Memory hook:* first letters spell …

Compare the look-alikes

Term	Slide wording	Plain English + IT example
A	"…"	…
B	"…"	…

Pattern / framework block (fixed labels)

What it does, in plain terms: …

Context / problem: …

Solution: …

Weaknesses: …

Real-world example: …

Situational practice: justify the action (Final)

Answer skeleton for any scenario question.

1. Identify the actor and *every* stakeholder.
2. Name the concept(s) from the course that apply.
3. Run every framework the course taught (e.g. all four decision approaches).
4. Verdict, the condition that would flip it, and what should have been done.

A. Short title of the scenario situational question

Scenario: …
Stakeholders: …
Concepts: …
Verdict: **Not justified / Justified only if …** Reasoning through each framework.

Phenomenon → solution bank

Q. Why does … happen?

- *Phenomenon:* …
- *Solution:* …
- *Examples:* (a) … (b) …

Where to look if a question goes past the slides

Topic	Textbook section	Printed page
…	Ch. 3.2	57

Exam-day pitfalls — read before you start

1. Writing only N−1 items of an N-item list.
2. Mixing up the two look-alike terms in section 1.

Quick-reference summary — last-minute checklist

- The one-line answer to each guaranteed question.
- Every list count: 4 objectives, 5 motives, …
